

DRE-LED053-1

[GB] INSTRUCTIONS: INSTALLATION, SERVICE, USE

PRODUCT: Lighting fitting with LEDs

NB

1. Technical changes prohibited.
2. Keep the instructions.

[A] Read prior to commencing installation:

1. The lighting fitting is used for decorative purposes to create light accents.
2. Installation should be performed in accordance with the recommendations set out in these instructions.
3. The lighting fitting is built based on unreplaceable LEDs. In case of damage to any of the diodes, the fitting is not fit for repair.
4. The lighting fitting should be installed indoors, taking care not to expose it to dust, moisture or water or to other adverse conditions. Protection class: IP20.
5. The light fitting can only be installed on a normal flammable base (i.e. with an ignition temperature of at least 200°C, which does not deform or soften at that temperature e.g. wood and wood-derivative materials with a thickness of more than 2mm) or an inflammable base (e.g. which is fire resistant e.g. metal, plaster, concrete) (according to EN 60598-1).
6. In case of failure of any component of this product, in particular connecting cable, which can not be replaced, you must immediately withdraw this product from operation.
Product shall be utilized (see WEEE marking).
7. The light fitting, when properly assembled, may only be connected to a properly functioning electrical installation system in compliance with the applicable standards.
8. When choosing the place of installation take into account the minimum distances between the light fitting, once installed, and other fixtures places lit and elements in the vicinity.
9. Due to the fact that, during operation lighting, elements of the light fitting heat up to a high temperature, it is absolutely necessary to turn off the electricity supply and wait enough time so that the elements have cooled down before commencing any activity (e.g. cleaning).
10. In no case should the light fitting be covered with any material, free air circulation must be ensured for the elements that become hot otherwise there is a risk of fire!
11. For cleaning purposes, use only delicate, dry fabrics, do not use cleaning fluids.
12. The Importer/Supplier shall bear no liability for any harm arising from improper installation, use of improper elements, technical changes or failure to observe these instructions.

[B] Installation:

1. Perform installation in accordance with the enclosed diagram.
2. Prior to connecting to the electricity supply, ensure that all of the electrical connections and clamps have been installed correctly in a manner preventing faulty operation.
