The Stratton Range Stratton Eco

Stratton Eco. Create a stunning display with our stylish range of solid wooden lighting bollards. Fitted with energy efficient LED lamp unit. Can be used in many places including, decking areas, driveways and paths etc

A slightly smaller version of our Stratton Single this lighting bollard is sure to make an impact where ever you put it. It will give you years of reliable service.

Made from components that can be recycled or naturally decompose at the end of its useful life. We believe style doesn't have to leave a legacy long after the light has been finished with.

We really want you to appreciate this product to its maximum so give it a coat of Danish oil before it leaves us. This brings out the fantastic colours and grain and ensures it stays that way.

Milled from "green" timber this lighting bollard will crack, twist and warp over time - this is completely normal and just adds to the character, no 2 will ever be the same!

Quick and easy to install, simply create a hole in the ground and fix in place with your preferred concrete mix. Then connect the power using a water-proof electrical connector (not supplied) - simple!

Features & Benefits:

- Durable Materials & construction
- Multiple timbers options
- 240v power & flying lead
- 1.3w Warm white LED lamp
- Easy to install
- Low maintenance
- Sustainably sourced timbers
- Dimensions: 95x95x1200 (900mm above ground level)

This lighting bollard requires mains voltages, we recomend you seek the advise of a qualified professional
