

LED Pro-Disc Mini

LED Energy Saving Bulk Head Light

The LED Pro-Disc Mini is a cost effective fitting suitable for commercial and domestic applications. The microwave sensor makes it ideal for corridors where energy savings can be maximised via the in-built sensor.

Standard Unit (LED/PDM/10W/5K)

- 10W LED replacement for 16W 2D lamps (at full power)
- 820 lumens
- 5000K Cool White
- IP20
- Working temperature $-10^{\circ}\text{C} - 50^{\circ}\text{C}$
- 100 pcs SMD LED
- 30,000 hours average life

Microwave Sensor (LED/PDM/10W/5KMS)

- Maximum mounting height 12m
- Detection angle $30-150^{\circ}$
- Detection range 12-18m (diameter) adjustable
- Time setting 10 seconds to 30 minutes adjustable
- Light control 5-50 lux adjustable or disable
- Maximum slaves 30

Master / Slave Options - For Unit with integral microwave sensor

Option A

Option B
