Manot Self-Test Exit Sign, LED 3in1 3000K IP65

Kosnic's LED Emergency Exit Bulkhead is a self-test, self-contained, robust, multi-purpose, maintained or non-maintained 3-hour emergency exit sign solution. The fitting is adaptable to be surface mounted, recessed or installed with a tilting bracket. It is supplied with the upward arrow exit sign for wall mounting and can be used without signs as an emergency light. When surface mounted the fitting can make use of a strip of 8 LEDs set in the bottom edge to provide doorway illumination below the sign in emergency mode. This version of the emergency module incorporates AST technology that will perform regular automatic function and duration tests as required by EN 62034, reporting the results via a bi-coloured LED indicator built into the luminaire.
