

Wiring

Having correctly identified the wiring from your existing light fitting, Pull the mains wire through the hole and connect to the quick connection terminal in the following way.

Check that...

You have correctly identified the wires. The connections are tight. No loose strands have been left out of the connection block.

Technical data

Supply Voltage: 220-240 V~, 50 Hz
Bulb Type: 2 x 5W LED module (COB) CCT, 3000/4000/6500K This product contains a light source of energy efficiency class **F**.

 Non-replaceable light source

 Non-replaceable control gear

 Conformity with all relevant UKCA Directive requirements.

 Conformity with all relevant EC Directive requirements.

-  This product is Class 1, must be connected to earth.
-  Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or local store for recycling advice.
-  This product is not suitable for dimming.
-  This product is rated at IP54.
-  This product is rated at IK06.

Care and Safety

We recommend cleaning with a soft dry cloth. Do not use solvents or abrasive cleaners as these could damage the finish. For your safety, always switch off the power supply before cleaning.

This bulb is protected by a glass shade. This part must be replaced immediately should the glass shade become cracked or damaged. This fitting must not be used without the glass shade in place.

www.saxbylighting.com

Thank you for purchasing this light fitting. Please read the instructions carefully before use to ensure safe and satisfactory operation of this product. Please retain these instructions for future reference.

Warning

This is a Class 1 product and must be earthed.

Please read these instructions carefully before commencing any work.

This unit must be fitted by a competent and qualified electrician.

Install in accordance with the IEE Wiring regulations and current Building Regulations.

Check the pack and make sure you have all the parts listed.

To prevent electrocution switch off at mains supply before installing or maintaining this fitting. Ensure other persons cannot restore the electrical supply without your knowledge. If you are in any doubt, please consult a qualified electrician.

This light fitting should be connected to a fused circuit.

If replacing an existing fitting, make a careful note of the connections.

Take care not to drill into any pipes or mains cables beneath the surface during mounting holes preparation.

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your local authority or retailer for recycling advice.

Layout

Plan the desired layout of this fitting carefully, ensuring the cables will reach the distance between the junction box and the light fitting.

Avoid locating any cables in positions that would cause a hazard. Position cables and outdoor rated junction boxes (not supplied) away from areas where they may be at risk from being cut, trapped or damaged.

We recommend that you use H05RN-F specification cable (not supplied) which is an outdoor grade, rubber sheathed cable.

Decide on the position of the luminaire. Depending on the location, an approved outdoor rated plug and socket may be required. Alternatively an approved outdoor rated external terminal block may be used.

The mains supply cable must have a minimum cross section area of 1.0mm².

Cables must be protected using suitable conduit or plastic trunking.

Installation

Existing fittings must be completely removed before installation of a new product. Before removing the existing fitting, carefully note the position of each set of wires.

Note that the power needs to be isolated/switched off at the fuse board.

Ensure that the screws and cable entry points are sealed to maintain the IP rating of the product.

After deciding the layout of the light fittings ensure that the cables are long enough to connect to desired positions

- Use tools to remove the lampshade, then separate the backpanel from the lamp body.
- Decide on the position of the luminaire. Fixed the backpanel to the wall securely using the screws and wall plugs supplied.
- Pull the wire through the hole and connect to the connection block refering to the wiring diagram.
- Choose your preferred colour by using the CCT Switch.
- Fixed back the lamp body to the backpanel, then fixed back the lampshade into lamp body.
- Power-on. Your light is now ready for use.
